PROFILE INFO

Full-Stack Developer with 2+ years of experience specializing in the MERN stack and SaaS product development. Skilled in designing scalable, customer-centric web and mobile applications with a strong focus on performance, clean UI/UX, and modern frameworks. Adept at working across the full SDLC, from architecture to deployment, and collaborating with cross-functional teams to deliver impactful products.

PROFESSIONAL EXPERIENCE

- Developed and deployed scalable SaaS platforms using MERN stack, improving feature delivery speed by 25%.
- Built REST APIs and WebSocket integrations handling 10K+ concurrent requests/day, reducing downtime and improving reliability.
- Integrated PostgreSQL and MongoDB for optimized data queries, improving query response times by 30%.
- Designed responsive UIs with React.js and Next.js, enhancing user engagement and cutting bounce rates by 15%.
- Collaborated with product managers and designers to ship features faster, meeting 95% of sprint deadlines.

PROJECTS

QiKo – Web & Mobile Platform for Barbershop Experience
- Enabled customers to join live virtual queues and track positions, improving customer retention by 20%.
- Streamlined booking workflows for shop owners, reducing manual scheduling effort by 40%.

Momentum – Coach-Athlete Engagement Platform
- Implemented challenge tracking and recognition features, boosting athlete participation by 35%.
- Delivered tools for coaches/admins, reducing manual reporting time by 50%.

TheList - Lifestyle Reservation App
- Built reservation workflows for restaurants & nightclubs, enabling 5K+ bookings/month.
- Delivered interactive floorplan booking that increased venue conversion rates by 18%.
- Added VIP access & personalized requests, improving premium user adoption.

Connexio (Ongoing) - UCaaS & Customer Engagement Platform
- Developing CRM and communication automation modules projected to reduce customer churn by 15%.
- Enhancing intelligent workflows to boost team productivity.

Fanzoo App - Sports Engagement Platform
- Built athlete-fan interaction modules, resulting in higher engagement compared to legacy platforms.

PERSONAL PROJECTS

- **Slack Webhook Demo** – Integrated Slack webhooks for real-time notifications where user can enter Slack webhook url and the channel name and can test the error message.
- **ZapLink (URL Shortener)** – Developed a simple, fast, and reliable URL shortener with subscription models added.
- **Dynamic Schedule Creator Form** – Built a customizable form-based scheduling system.
- **Queryon (AI Chat Widget) (Ongoing)** – Building an AI-powered chat widget that integrates with websites and can be trained by admins.

EDUCATION

2020 - 2023
Bachelor of Computer Applications
DAV College, Amritsar, PB

2023 - 2025
Master of Computer Applications
Lovely Professional University, Phagwara, IN-PB

SKILLS

- **Frontend:** React.js, Next.js, Angular 19 (basics), React Native (basics), Refine.dev.
- **Backend:** Node.js, FastAPI (basics), Supabase, Prisma.
- **Databases:** PostgreSQL, MongoDB.
- **UI & Styling:** Tailwind CSS, MUI, Ant Design, Mantine UI, Shadcn, Styled Components, EJS, Handlebars.
- **State Management:** Redux, Context API, Zustand, Tanstack Query.
- **Integration & Communication:** RESTful APIs, WebSockets (Socket.IO), Axios.
- **Other Tools & Concepts:** TypeScript, i18n, Git, GitHub, VS Code, Postman, Agile, Vercel Deployments.

STRENGTHS

- Strong problem-solving & debugging skills
- Quick learner, adaptable to new technologies
- Collaborative and effective communicator
- Passionate about delivering scalable, user-focused solutions
